

ACUTE RENAL FAILURE

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Clarify the acuity (i.e., acute or chronic).
- Detail the type of necrosis with acute renal failure:
 - *Tubular*
 - *Cortical*
 - *Medullary*
- Identify the underlying cause or disease (e.g., dehydration, post-traumatic, drug-induced, etc.).
