

## BREAST DISORDERS ASSOCIATED WITH PREGNANCY

*The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:*

- Identify the timing of the occurrence of the condition (i.e., the trimester of pregnancy, puerperium period, with lactation).
- Specify the type of disorder such as:
  - *Abscess.*
  - *Nonpurulent mastitis.*
  - *Infection of the nipple.*
  - *Retracted or cracked nipple.*
  - *Suppressed lactation.*
  - *Galactorrhea.*
