

## CEREBRAL ARTERY INFARCTION

*The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:*

- Specify the location such as:
  - *Precerebral arteries (e.g., vertebral, basilar, etc.).*
  - *Cerebral arteries (e.g., middle, anterior, etc.).*
  - *Cerebella arteries.*
- State the laterality (i.e., right or left).
- Identify the underlying cause:
  - *Thrombosis*
  - *Embolism*
  - *Occlusion*
  - *Stenosis*
- Provide information regarding tPA administration in a different facility within 24 hours of admission to the current fac • Specify the location such as:
