

CEREBROVASCULAR DISORDERS - OTHER

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Specify conditions such as:
 - *Non-ruptured dissection of cerebral arteries and aneurysms.*
 - *Atherosclerosis.*
 - *Cerebrovascular insufficiency.*
 - *Cerebral amyloid angiopathy.*
- Identify any underlying disease (e.g., systemic lupus erythematosus, tuberculosis, etc.).
- List any residual conditions (e.g., hemiplegia, left, non-dominant status post-CVA).
