

CHLAMYDIA TRACHOMATIS

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Identify the site of the infection (e.g., conjunctiva, urethra, rectum, etc.).
- Indicate when the disease is sexually transmitted.
- Include any associated conditions (e.g., ectopic pregnancy, infertility, chronic pelvic pain, etc.).
- Detail any co-morbid conditions (e.g., hypertension, diabetes, HIV, etc.).
