

CHOLECYSTITIS WITH CHOLELITHIASIS

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Specify the acuity (i.e., acute or chronic).
- Detail if biliary system obstructions are or are not present.
- Identify when calculi are present.
- List the location of any biliary system calculi (e.g., gallbladder, bile duct, etc.).
- Include any associated conditions (e.g., cholangitis).
