

## COAGULATION DEFECTS

*The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:*

- Differentiate hemorrhagic disorders from coagulation defects.
- Clarify coagulopathies as being hereditary or acquired.
- Detail any underlying disease (e.g., liver disease, Lyme disease, Lupus, etc.).
- State the specific factor or protein deficiency (e.g., hereditary factor VIII deficiency, hereditary factor XI deficiency, Christmas disease, etc.).
- List medications or drug use with any manifestations (e.g., hematuria due to Coumadin).
