

GONOCOCCAL INFECTIONS

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Identify the specific site or body system affected (e.g., eye, musculoskeletal system, etc.).
- Indicate the presence or absence of periurethral And accessory gland abscess when the lower genitourinary tract is affected.
- Link any associated manifestations (e.g., pneumonia, peritonitis, sepsis, etc.).
- Provide information regarding health department notification.
