

MACULAR DEGENERATION

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- State the laterality (i.e., right, left, or bilateral).
- Identify age-related macular degeneration as being non-exudative or exudative.
- List macular degeneration as being cystoid, drusen, puckering of macula, or toxic maculopathy.
- Specify congenital or hereditary forms .
