

## MASTOIDITIS AND RELATED CONDITIONS

*The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:*

- Specify the acuity as being acute or chronic.
- Detail any subperiosteal abscess, petrositis, or postauricular fistula.
- Provide information regarding the presence or absence of other complications.
- List any underlying disease (e.g., infectious or parasitic diseases).
- State the laterality (i.e., right, left, or bilateral).
