

MOOD DISORDERS

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Specify bipolar disorder episodes as being manic, depressed, or mixed.
- Indicate if major depression is a single or recurrent episode.
- Provide information regarding the presence or Absence of psychotic symptoms or features.
- Clarify the remission status of the disorder (e.g., full, partial).
- Detail the severity of the disorder (e.g., mild, moderate, severe).
