

NERVE, NERVE ROOT AND PLEXUS DISORDERS

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Identify the specific nerve affected (e.g., brachial, facial, etc.).
- State the laterality when applicable (e.g., right, left, or bilateral).
- Indicate upper or lower limb.
- List any underlying disease (e.g., neoplasm).
- Provide information regarding disorders that are secondary to an injury.
- Detail any nerve compression.
