

## NEWBORN, NORMAL, HEALTHY

*The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:*

- Clarify any prematurity.
- List the gestational age and weight of the infant (e.g., 38.4 weeks; 7 lbs., 3 oz.).
- Specify any abnormalities in fetal size and health that can be attributed to variations in gestation age (e.g., small for gestational age, 36 wks, 2312 gm).
- Detail the number of fetuses born.
