

NEWBORN, NOXIOUS INFLUENCES

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Clarify the specific noxious substances transmitted via the placenta.
- Detail neonatal withdrawal symptoms occurring due to maternal use of addictive drugs.
- Specify any reactions due to opiates and tranquilizers administered during labor and delivery.
- List any maternal smoking or exposure to tobacco smoke in the perinatal period.
- Identify reactions or withdrawal to therapeutic drugs administered to the newborn.

- Include the specific drug and the reason for its use.
