

## NON-TRAUMATIC BRAIN HEMORRHAGE

*The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:*

- Identify the type and site, such as:
  - *Extradural*
  - *Intracerebral*
  - *Subcortical, cortical, brain stem, cerebellum, or intraventricular*
  - *Subarachnoid*
  - *Carotid siphon, bifurcation, anterior or posterior communicating artery, middle cerebral, basilar, or vertebral artery*
  - *Subdural*
  - *Specify the acuity (i.e., acute, subacute, chronic)*
