

PATHOLOGY FINDINGS, ABNORMAL FINDINGS OF BODILY FLUIDS, SUBSTANCES AND TISSUE

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Indicate the significance of abnormal findings and link them to a disease process when possible.
- Clarify when body fluids, substances, and tissues have no diagnosis.
- Detail any abnormal cytology or histology findings.
- Report abnormal levels of enzymes, hormones, and other drugs in cerebrospinal fluid, organs, and body cavities.
- Include atypical cytology findings from the cervix.
