

POLYNEUROPATHIES

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Detail any underlying disease (e.g., amyloidosis, diabetes, etc.).
- Specify the type (e.g., hereditary motor and sensory, Guillain-Barre, induced by drugs, radiation, alcohol, etc.).
 - *State the responsible drug.*
- Identify when a sequelae occurs.
 - *Report any conditions resulting from the sequela.*
