

SICKLE CELL ANEMIA

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Identify the type (e.g., Hb-S S, Hb-C, Hb-S trait, thalassemia, etc.).
- Detail the presence or absence of any crisis or manifestations such as:
 - *Sickle cell crisis with acute chest syndrome.*
 - *Splenic sequestration.*
 - *Infection.*
- List any related fever.
