

SIGNS AND SYMPTOMS RELATED TO SKIN AND SUBCUTANEOUS TISSUE

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- State the laterality (e.g., subcutaneous lump, right lower leg).
- Detail any associated condition or disease (e.g., bruises easily, leukemia).
- List specific sensory disturbances such as:
 - *Hypoesthesia.*
 - *Paresthesia.*
 - *Hyperesthesia.*
- Identify the underlying cause of any sign or symptom when known.
