

SYNOVIUM DISORDERS

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Specify conditions such as:
 - *Synovitis and infective synovitis*
 - *Tenosynovitis*
 - *Abscess of tendon sheath*
 - *Trigger finger*
 - *Spontaneous rupture of synovium and tendon*
 - *Acquired short Achilles tendon*
- State the laterality (i.e., right, left, or bilateral).
 - *List the specific location of the disease (e.g., shoulder, upper arm, ankle, foot and toes, thumb, little finger).*
- Identify any causative bacterial agent.
