

TACHYCARDIA

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Identify the type of tachycardia such as:
 - *Supraventricular.*
 - *Ventricular.*
 - *Re-entry ventricular arrhythmia.*
 - *Paroxysmal (atrial) tachycardia.*
- Specify when it is associated with abortion, ectopic or molar pregnancy, and any obstetric surgery or procedure.
- Detail when tachycardia is present in a newborn
