

THROMBOCYTOPENIA

The following are important documentation tips and strategies for this disease/condition as required by the specificity needed in ICD-10:

- Identify as being:
 - *Primary*
 - *Secondary*
 - *Congenital or hereditary*
- List the underlying condition in secondary thrombocytopenia (e.g., alcohol-induced, post-transfusion).
- Specify other hemorrhagic conditions such as allergic purpura, qualitative platelet defects, non-thrombocytopenic purpura, or immune thrombocytopenic purpura.
