Natalie Nelson | Physician Services Director

Goal of PQRS

Improve health care and help physicians and patients by:

- Assessing the quality of care provided to Medicare patients
- Ensuring patients get the right care at the right time
- Measuring quality of care by comparing against a set of quality metrics
- Rewarding value of care rather than volume

PQRS 2016

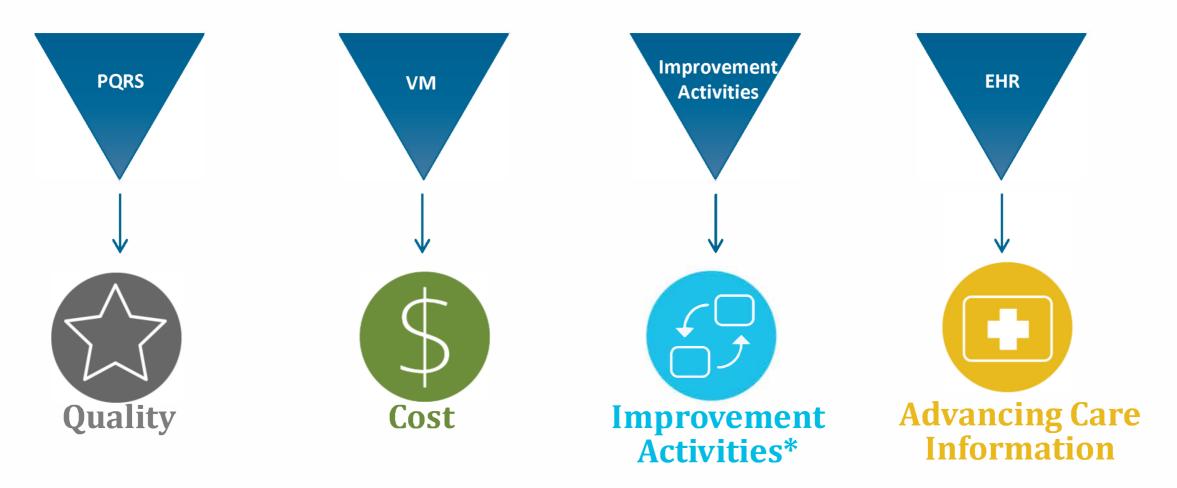

- Final year of PQRS reporting
- Not reporting will negatively impact 2018 payments,
 - -4% from Medicare fee-for-service beginning January
 2018

MIPS (Merit-based Incentive Payment System) 2017

- Part of MACRA (Medicare Access and CHIP Reauthorization Act)
- Combines portions of several existing Medicare initiatives that are being "sunsetted", including PQRS, Value-based Payment Modifier, and Meaningful Use
- All physicians and other eligible clinicians will automatically participate in MIPS, except:

What is the Merit-based Incentive Payment System?

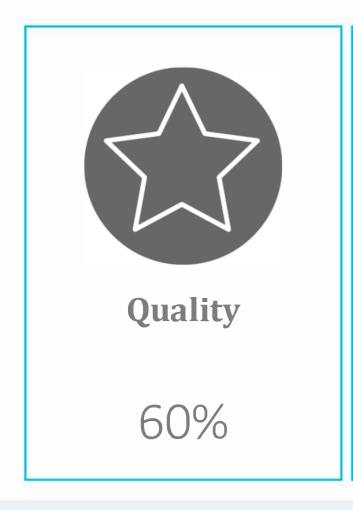

- Moves Medicare Part B clinicians to a performance-based payment system
- Provides clinicians with flexibility to choose the activities and measures that are most meaningful to their practice
- Reporting standards align with Advanced APMs wherever possible

*This is a new category.

What are the Performance Category Weights?

Weights assigned to each category based on a 1 to 100 point scale

Transition Year Weights
